

Digital Transformation

Digitalisation is a strategic topic for the EU. The commission's ambition is **A Europe fit for the digital age. Technology that works for people, a fair and competitive digital economy, an open, democratic and sustainable society.**

Citizenship education has a specific role of empowering citizens for participating in the discussions about socio-political challenges.

Digitalisation should regarding the EU also play a bigger role in the education sector.

2. Big Data & Artificial Intelligence in Society and Education

White Paper on AI ([EU COM 2020/65 final PDF](#))

training ([Council of the EU 13297/19 EDUC 417, 25 October 2019 PDF](#))

Position paper of the European Economic and
Social Committee regarding digitalisation and
education ([EESC - SOC/622 DOC](#))

Digital Competence – More than Media

Competence framework **DigComp 2.1**: “Learning to swim in the digital ocean” [\(PDF\)](#)

What digital competence/literacy is **not yet sufficiently reflected or under-represented**?

If new technology development depends on critical assessment and constructive participation, what can **especially Education for Democratic Citizenship** offer?

What do we educators need to learn?

Paths to Learning DT

Cross-sectoral and interdisciplinary learning

Overcoming the **Big-Data BIAS**: 1) fundamental criticism of regarding surveillance capitalism, 2) a picture of DT as only driven by Big Data, (human) automatisaton or surveillance capi-talism. 3) ignoring the existing alternative DTs (non-centralised, fair platforms, interoperability, openness, human-centered).

Civil Society Organisations as learning and empowerment space.

Consumer/produser **awareness raising**.

Co-determined regulation, information & test bodies.
